Skills Summary

- **Programming Languages:** Java, Python, C/C++, JavaScript, SQL
- **Frameworks & Tools:** Spring Boot, Kafka, Kubernetes, Redis, Docker, PyTorch, MySQL, Linux, Git
- **Tech Skills:** Microservices, Event-Driven Architecture, Distributed Systems, CI/CD, Optimization, Database, REST
- **Languages:** English (Full Professional Proficiency), Korean (Native Proficiency)

Experience

- **OKX** Hong Kong
Software Engineer in Structured Financial Product Team (Asset and Financial Product) Feb 2024 - Present
 - Engineered and maintained scalable, fault-tolerant structured financial system projects which includes but not limited to: **Dual Investment, Shark Fin, Snowball, BTC Yield+**, resulting in a 500% increase in transaction volume
 - Collaborated closely with asset & liquidity team to design institutional-grade trading system with market data processing, order management and automated settlement workflows through event-driven architecture
 - Monitored system performance through Grafana, and supported production issues and resolved anomalies promptly to ensure seamless operations
 - Contributed to the enhancement of financial products, driving an increase in Assets Under Management from \$200 million to above **\$1 Billion** since joining the team.
- **Huawei** Hong Kong
Research Intern in AI Framework & Data Tech Lab Nov 2022 - May 2023
 - Researched and tested an advanced distributed graph optimization algorithm for shortest path estimation finding in a large-scale graph of over 100k nodes, by leveraging isometric embedding
 - Contributed to the team's research project by designing an optimization algorithm and scripts using Python, enabling a substantial acceleration in shortest path estimate finding which surpasses the conventional methodology
- **The Chinese University of Hong Kong** Hong Kong
Summer Research Intern Jun 2022 - Aug 2022
 - Implemented Deep Reinforcement Learning algorithms for Robot manipulation and trained a model for logistic solution using Python (Open Sources: RLkit, Robosuite, Stable-Baselines3)
- **The Capital Mechanized Infantry Division Artillery Brigade** Republic of Korea
Fire Direction Center Squad Leader Oct 2020 - Apr 2022
 - Analyzed firing data for K-9 self-propelled howitzer and coordinated firing support for the artillery units' operations
- **Hong Kong Applied Science and Technology Research Institute (ASTRI)** Hong Kong
Software Engineer Intern Jul 2020 - Aug 2020
 - Created a system for detecting and analyzing 700+ continuous Wi-Fi signals and database management systems with decentralized computing processes using Python, Docker, MySQL, Postman and FastAPI

Projects

- **Advanced Course Selection System** Hong Kong
Skills: React, Node.js, AWS, Web Application, System Architecture Feb 2023 - May 2023
 - Built a web-based course management application for students supporting 50+ majors. Adhered to the software engineering principles and designed DFD/UML specifications
- **COVID Route-Tracking Mobile App** Hong Kong
Skills: Flutter, Google Maps API, Data Management, Firebase Dec 2019 - Feb 2020
 - Developed an Android/iOS compatible mobile app, providing routes for the initial 1,000+ infected personnel with a real-time GPS alarm system. Received an Outstanding Student Award from CUHK for societal contribution.

Honors and Awards

- Convocation Outstanding Services and Creativity Student Award 2022/23, CUHK Jun 2023
- Industrial Scholarship, CUHK Sep 2022
- Outstanding Student Award: Innovation and Invention, CUHK Aug 2020
- MIT Virtual HealthHack Winner, MIT HK Innovation Node Apr 2020

Extra-Curricular Activities

- **Mobile App Development** Hong Kong
Working as a full-stack developer using Flutter and Firebase. Published 12 apps with a total of over 10,000 downloads Dec 2019 - present
- **Cathay Hackathon 2022 Finalist** Hong Kong
Developed and pitched AI-chatbot integrated in-flight service solution application Nov 2022

Education

- **The Chinese University of Hong Kong** Hong Kong
BEng First Class Honours (Dean's List) - Mechanical and Automation Engineering (Major); Aug 2018 - Dec 2023
MGPA: 3.67/4.00, CGPA: 3.49/4.00 Computer Science (Minor)
