Skills Summary

- **Programming Languages**: Java, Kotlin, Python, C/C++, JavaScript, SQL
- **Frameworks & Tools**: Spring Boot, Kafka, K8s, Redis, Docker, Angular, React, OpenStack, PyTorch, MySQL, Linux, Git
- **Tech Skills**: Microservices, Event-Driven Architecture, TDD, CI/CD, RESTful APIs, Database Design, Optimization
- **Certifications**: AWS Certified Cloud Practitioner, AWS Certified AI Practitioner
- **Languages**: English (Full Professional Proficiency), Korean (Native Proficiency)

Experience

- **Société Générale Corporate and Investment Banking** — Hong Kong
  Front Office Developer in Equity Prime Brokerage — *Feb 2026 - Present*
  - Engineering proprietary services powering D1 and Securities Lending trading - including OMS, post-trade capture, locate engine, inventory management, and equity swaps engine systems
  - Working closely with traders & middle office to maintain and enhance business-critical tools with p99 latency, supporting intraday operations through incident triage, tactical fixes and monitoring
  - Owning 40+ production microservices on K8s with fault-tolerant, fail-safe design, building CI/CD with Jenkins/GitHub Actions, achieving 99.9% uptime and driving engineering quality through TDD and data integrity checks

OKX — Hong Kong
*Software Engineer in **Structured Financial Product*** — *Feb 2024 - Sep 2025*
- Engineered and maintained scalable, fault-tolerant structured financial system projects which includes but not limited to: **Dual Investment**, **Shark Fin**, **Snowball**, **BTC Yield+**, resulting in a 500% increase in transaction volume
- Collaborated closely with asset & liquidity team to design institutional-grade trading system with market data processing, order management and automated settlement workflows through event-driven architecture
- Contributed to the enhancement of financial products, growing AUM from $200 million to **$1 Billion** since joining

Huawei — Hong Kong
Research Intern in AI Framework & Data Tech Lab — *Nov 2022 - May 2023*
- Researched and tested an advanced distributed graph optimization algorithm for shortest path estimation finding in a large-scale graph of over 100k nodes, by leveraging isometric embedding
- Contributed to the team's research project by designing an optimization algorithm and scripts using Python, enabling a substantial acceleration in shortest path estimate finding which surpasses the conventional methodology

The Chinese University of Hong Kong — Hong Kong
Summer Research Intern — *Jun 2022 - Aug 2022*
- Implemented Deep Reinforcement Learning algorithms for Robot manipulation and trained a model for logistic solution using Python (Open Sources: RLkit, Robosuite, Stable-Baselines3)

The Capital Mechanized Infantry Division Artillery Brigade — Republic of Korea
Fire Direction Center Squad Leader — *Oct 2020 - Apr 2022*
- Analyzed firing data for K-9 self-propelled howitzer and coordinated firing support for the artillery units' operations

Hong Kong Applied Science and Technology Research Institute (ASTRI) — Hong Kong
Software Engineer Intern — *Jul 2020 - Aug 2020*
- Created a system for detecting and analyzing 700+ continuous Wi-Fi signals and database management systems

Extra-Curricular Activities

- **PolomeX - mock trading platform** — Hong Kong
  Developing user competition-based mock trading platform — *Jun 2026 - Present*
- **Mobile App Development** — Hong Kong
  Published 12 apps with a total of over 10,000 downloads using Flutter — *Dec 2019 - Present*

Projects

- **Advanced Course Selection System** — Hong Kong
  Skills: React, Node.js, AWS, Web Application, System Architecture — *Feb 2023 - May 2023*
  - Built a web-based course management application for students supporting 50+ majors.
- **COVID Route-Tracking Mobile App** — Hong Kong
  Skills: Flutter, Google Maps API, Data Management, Firebase — *Dec 2019 - Feb 2020*
  - Developed an Android/iOS compatible mobile app, providing routes for the initial 1,000+ infected personnel with a real-time GPS alarm system. Received an Outstanding Student Award from CUHK for societal contribution.

Honors and Awards

- Convocation Outstanding Services and Creativity Student Award 2022/23, CUHK — Jun 2023
- Outstanding Student Award: Innovation and Invention, CUHK — Aug 2020
- MIT Virtual HealthHack Winner, MIT HK Innovation Node — Apr 2020

Education

- **The Chinese University of Hong Kong** — Hong Kong
  BEng First Class Honours (Dean's List) - Mechanical and Automation Engineering (Major); Computer Science (Minor) — *Aug 2018 - Dec 2023*
  MGPA: 3.67/4.00, CGPA: 3.49/4.00
